Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Date 15 March 2026	Team ID SWTID-2026-8526	Project Name Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Maximum Marks 2 Marks
-----------------------	----------------------------	---	--------------------------

Map the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

PHASE OF JOURNEY	STAGE 1 Request Initiation	STAGE 2 Automated Task Creation	STAGE 3 Task Fulfillment
Actions What does the customer do?	- Submits a standard laptop request through the Service Catalog. - Provides the required request information.	- Waits for the request to enter the configured flow. - Request data is used to create the catalog task.	- Receives/uses the laptop after the request is processed. - Completes the intended procurement need.
Touchpoint What part of the service do they interact with?	- ServiceNow Service Catalog - Laptop request form	- ServiceNow Flow Designer / Workflow Studio - Create Catalog Task action	- Hardware assignment/fulfillment process - Catalog task outcome
Customer Thought What is the customer thinking?	"I need a standard laptop and want the request to be submitted correctly."	"My request should be processed automatically and turned into a task."	"I expect the laptop request to be completed efficiently and correctly."
Customer Feeling What is the customer feeling?	Needs clarity and confidence that the request has been captured.	Expects reassurance from an organized, automated process.	Satisfied when the requested laptop is fulfilled without unnecessary delay.

Process Ownership Who is in the lead on this?	Service Catalog / request process owner	Flow Designer / ServiceNow workflow owner	Hardware / IT procurement fulfillment team
Opportunities How can we improve this stage?	• Make the laptop request fields clear and simple. • Reduce ambiguity in required information.	• Automate task creation consistently. • Use request data directly in the task. • Standardize assignment to Hardware.	• Track task status clearly. • Improve fulfillment visibility and completion communication.

Project-specific workflow values: Flow = Standard laptop task | Trigger = Service Catalog | Action = Create Catalog Task | Assignment Group = Hardware

CUSTOMER JOURNEY MAP — PROCESS DETAILS

Journey Stage	Customer Experience	Process Ownership	Improvement Opportunity
1. Request Initiation	Action: Submit standard laptop request. Touchpoint: Service Catalog. Thought: "I need a laptop and want the request to be easy." Feeling: Needs clarity and confidence.	Service Catalog / request process owner	Simplify the request form, clearly identify required fields, and make the standard laptop option easy to find.
2. Automated Task Creation	Action: Request enters the flow. Touchpoint: Flow Designer. Thought: "My request should be processed automatically." Feeling: Reassured by automation.	ServiceNow Flow Designer / workflow owner	Use request data consistently, keep the flow reusable, and automatically create the correct catalog task.
3. Task Fulfillment	Action: Hardware team processes the task. Touchpoint: Catalog task / fulfillment. Thought: "I expect timely completion." Feeling: Satisfied when fulfilled.	Hardware / IT procurement fulfillment team	Improve task-status visibility, fulfillment tracking, and communication of completion to the requester.

CONFIGURATION SUMMARY	VALUE
