

PROJECT EXECUTABLE FILES

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Date	15 March 2026
Team ID	SWTID-2026-8526
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	3 Marks
Platform	ServiceNow Workflow Studio / Flow Designer
Flow Name	Standard laptop task
Application	Global

Project Executable Files

This submission documents the executable/deployable configuration evidence available for the ServiceNow Flow Designer project. The supplied workflow screenshots demonstrate the configured flow, Service Catalog trigger, and Create Catalog Task action.

Step 1: Submission Checklist

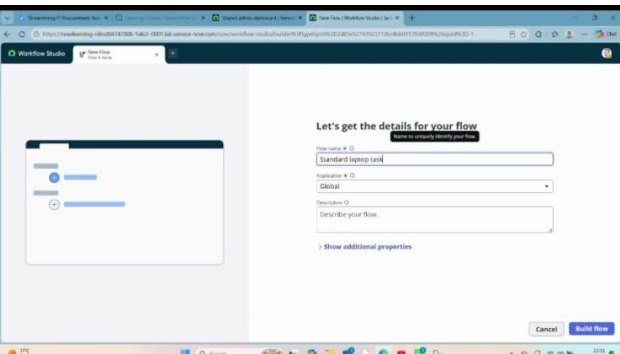

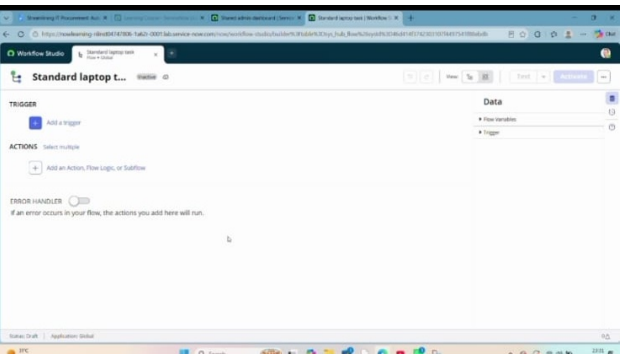

S.No	Item to Submit	Submitted / Status
1	Complete source code (all files and folders)	NA – ServiceNow Flow Designer configuration
2	README / Setup Guide	Included in project documentation
3	requirements.txt / package.json / dependency file	NA – no local dependency file
4	Database schema / seed files (if applicable)	NA – not provided
5	Environment configuration file (.env.example or similar)	NA – not provided
6	Deployed application URL (if hosted)	Not provided
7	APK / Executable binary (if applicable)	NA – ServiceNow cloud configuration
8	Dockerfile / Containerization config (if applicable)	NA – not applicable
9	Test files and test results	Not provided
10	Demo video or walkthrough (if required)	Workflow screenshots supplied

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Project Component	Details
ServiceNow Flow	Standard laptop task
Trigger	Service Catalog
Action	Create Catalog Task
Request Data	Request item data supplied by the Service Catalog trigger
Task Description	Laptop need to configured
Assignment Group	Hardware
Local File/Folder Structure	Not applicable to the ServiceNow cloud configuration shown

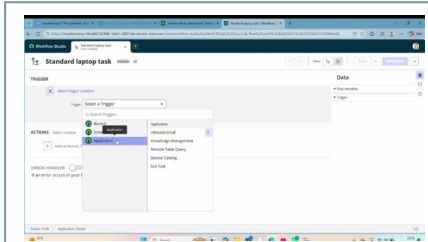

Workflow Evidence

	
Flow creation: Standard laptop task	Workflow Studio workspace

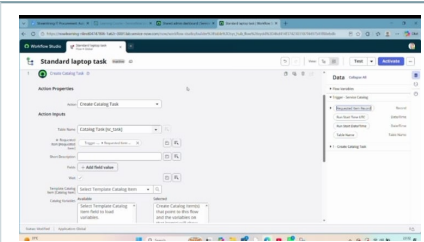

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not provided. The workflow is configured in ServiceNow Workflow Studio.
Login Credentials (Demo)	Not provided
Platform / Hosting Provider	ServiceNow
Repository Link	Not provided
Demo Video Link	Not provided; workflow screenshots are supplied as evidence.

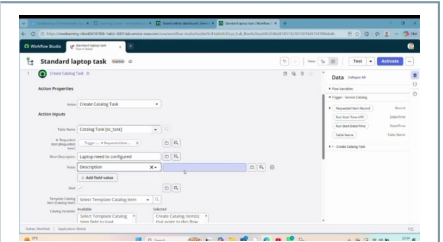

Configuration Evidence

Service Catalog trigger selection

Create Catalog Task action selection

Create Catalog Task properties

Key configured values

Flow	Standard laptop task
Trigger	Service Catalog
Action	Create Catalog Task
Short Description	Laptop need to configured
Assignment Group	Hardware

Step 4: Run Instructions

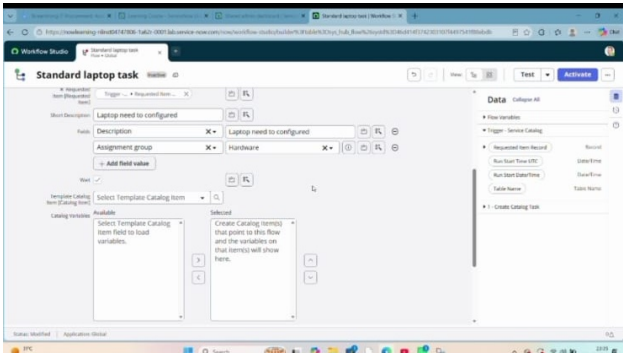

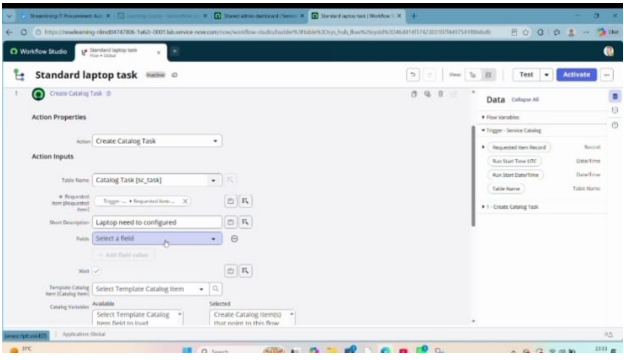

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step	Instruction
1	Open the ServiceNow instance and navigate to Workflow Studio / Flow Designer.
2	Open the flow named “Standard laptop task”.
3	Verify the Service Catalog trigger is configured.
4	Verify the Create Catalog Task action is present.
5	Verify the short description is “Laptop need to configured”.
6	Verify the assignment group is “Hardware”.
7	Use the available Service Catalog request context to test the flow according to the ServiceNow instance's permissions and configuration.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	No public deployment URL or login credentials were supplied.	Use the authorized ServiceNow instance.
2	No local source-code repository or dependency files were supplied.	Not applicable to the cloud Flow Designer configuration.
3	Test results were not included in the supplied material.	Validate the flow using an authorized ServiceNow test request.

Final Workflow Evidence

	
Configured task fields	Final action configuration
